1. This opinion contains indications relating to the following items:						
⊠ Box No. I Basis of the opinion □ Box No.II Priority						
= -	t of opinion with regar	d to novelty, inventive	step and industrial app	plicability		
Box No. IV Lack of unity of invention						
	t under Rule 43 <i>bis</i> .1(a)	(i)with regard to novel	lty, inventive step or in	idustrial applicability;		
Box No.VI Certain documents		· otatomont				
Box No. VII Certain defects in the international application						
Box No.VIII Certain observations on the international application						
2. FURTHER ACTION						
If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the						
International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1 bis(b) that						
written opinions of this International Searching Authority will not be so considered.						
If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the						
IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.						
For further options, see Form PCT/ISA/220.						
3. For further details, see notes to Form PCT/ISA/330						
3. For further details, see notes to Form PCT/ISA/220.

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/CN2005/000264

Bo	k No.	I	Basis of the opinion
1.	Wit	h reg	ard to the language, this opinion has been established on the basis of:
		a ti	international application in the language in which it was filed anslation of the international application into, which is the language of a translation hished for the purposes of international search (Rules 12.3(a) and 23.1(b)).
2.			ard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed a, this opinion has been established on the basis of:
	a.	type	of material a sequence listing table(s) related to the sequence listing
	b.	form	nat of material on paper in electronic form
	c.	time	of filing/furnishing contained in the international application as filed filed together with the international application in electronic form furnished subsequently to this Authority for the purposes of search
3.		furni	dition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or shed, the required statements that the information in the subsequent or additional copies is identical to that in the cation as filed or does not go beyond the application as filed, as appropriate, were furnished.
4.	Add	lition	al comments:

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/CN2005/000264

Box No. V Reasoned statement under Rule 43bis citations and explanations supporting			s.1(a)(i) with regard to novelty, inventive step or industrial applicability; guch statement		
1. Statemen		<u> </u>			
No	velty (N)	Claims	1-18	YES	
		Claims	none	NO

		Claims	none	NO	
Indu	Industrial applicability (IA)	Claims	1-18	YES	
		Claims	none	NO	

2. Citations and explanations

The invention relates to multicast transfer of data from a server device to multiple client devices, it discloses self-adaptive multicast and reliable transfer of digital files from a server device to one or more multiple client devices including an active device, one or more passive client devices and one or more smart client devices.

D1 and D2 are considered to be the closest prior art:

D1: US,A1,2003069930

D2: CN,A,1470018

D1 discloses a server which transmits an announcement comprising a structured information document and aggregate structure including XML document, image, video and audio elements of an available multicast service to the client terminals;

D2 discloses a method for distributing realtime updates to active application components in an active client position, comprises: establishing a communications connection between a platform managing the active application components and a configuration client; establishing a communications connection between the configuration client and a configuration server; delivering updates to the configuration client over communications connection, where each update corresponds to a particular application component; notifying the platform that updates are available;

It is obvious that not all the technical features in claims 1-18 are disclosed by D1 or D2, and further the technical solutions claimed are not obvious to a person skilled on the basis of D1,D2 or their combination. Thus, claims 1-18 have novelty under PCT Article 33(2), and have inventive step under PCT Article 33(3);

Claims 1-18 have industrial applicability under PCT Article 33(4), because the self-adaptive multicast transfer protocol claimed can be made or used in the industry.
